What I learnt today

Today I learnt

1. What is tables?
2. Use of table
3. How many various ways we use tables

Let us find difference between HTML and CSS

S.no	Aspect	HTML	CSS
1	**Stands for**	Hyper Text Markup Language	Cascading Style Sheet
2	**Structure**	Define structure and content	Defines presentation and input
3	**File Extension**	.html	.css
4	**Usage in web pages**	Always used	Typically used in conjunction with HTML
5	**Language type**	Markup Language	Style Sheet language
6	**Client side or server side**	Client side	Client side
7	**purpose**	Defines structure and content	Define presentation and input

HTML vs CSS

Lets explore on AI base methods

Cyber Applications of AI-base methods	Malware detection	PC malware
		Android malware
	Network Intrusion	Intruction detection
		Anomlay detection
	Spam detection	Web phishing detection
		Mail phishing detection
		Spam on social networks
		Spam mail
	Other	Countering APTS
		Identify domain names generated by DGAs
